Assignment of Interactive Web Development

About Me

Web-Passionate full stack developer, eager to take part in this changing web. Well-versed in numerous concepts of Front-end Languages and Frameworks (HTML, CSS, JavaScript), Strong background in NodeJS, Express JS, Database Management Systems (MySQL and MongoDB), excellent in version control systems (Git and GitHub) and has a good understanding in web hosting platforms. Seeking a community where I can add value to the web using my skills and continue increasing my skill set.

About Me

I'm Marie Mireille Irafasha, currently in my third year at the University of Rwanda, pursuing a Bachelor's degree in Computer Science. Over the past few years, I've gained solid experience as a backend developer, particularly with JavaScript, Node.js, and MongoDB. I've had the opportunity to apply my skills through hands-on projects, including building technical documentation pages, personal portfolios, and product landing pages, following agile methodologies and working in teams. I also completed a backend development bootcamp with the SheCanCode program, where I honed my skills in developing efficient and scalable backend systems. I'm always eager to learn and adapt, recently integrating Swagger documentation into my projects.

About Me

Ishimwe Jean Marie Vianney is currently a third-year student at the University of Rwanda, pursuing a degree in Computer Science. I dedicated to acquiring knowledge and skills that will enable some people to contribute effectively to the field of computer science. Throughout my academic journey, I have engaged in various projects and coursework that have honed my programming skills and understanding of computer systems. My passion for learning drives him to stay updated with the latest trends in technology, making him an enthusiastic participant in discussions related to software development, data analysis, and cybersecurity.
